Manager of files

Content

Listing and viewing of files App

Download files in to App third parties

Deleting files from App

Viewing PDF files

Viewing the PDF files in the App third party

UnZip result file zip (Hy-tek) and results lxf (Splash/lenex)

Manager of files

It keeps all the files that are found in App and allows them to:

1st looking over

2^{dn} Open in other App

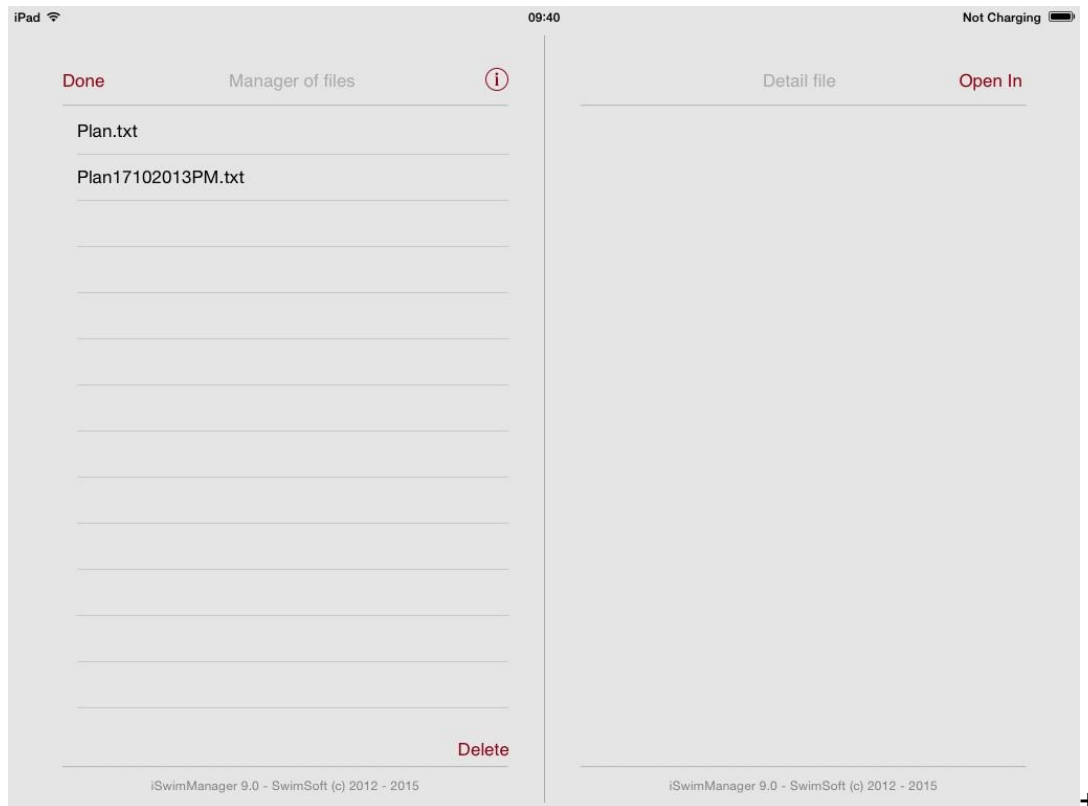

3rd Erase

After selecting, the basic screen appears, see Figure No. 453

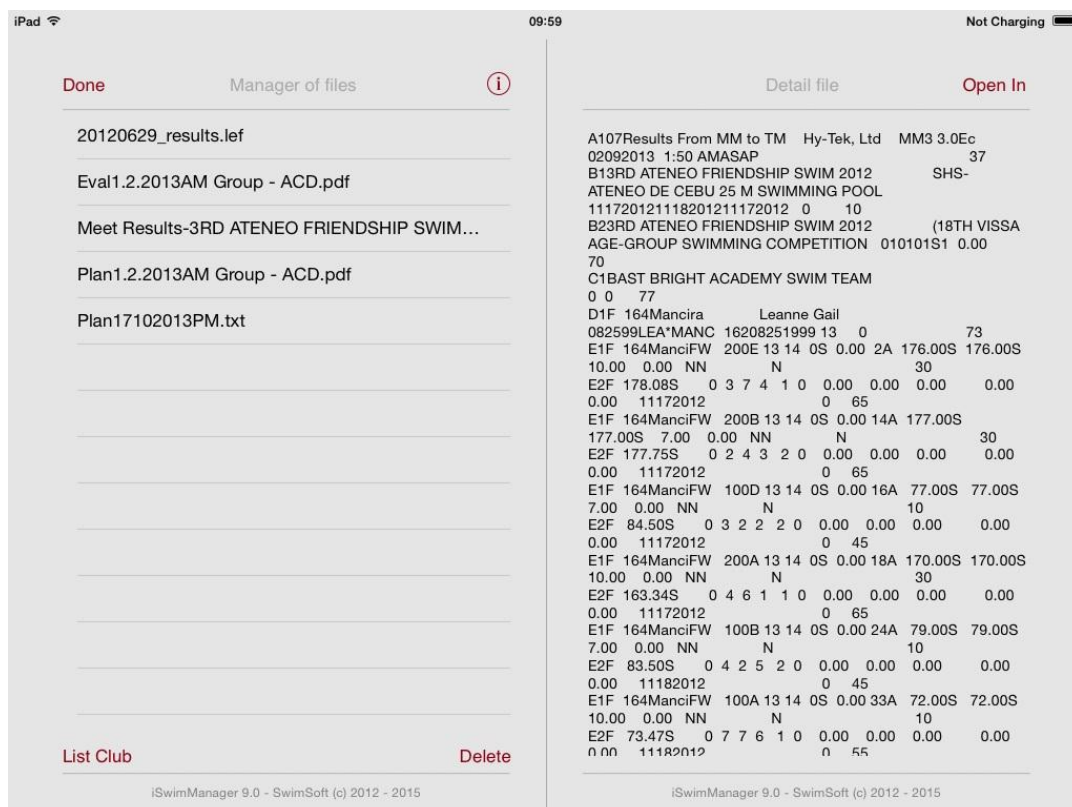

Listing and viewing of files App

When you load a file from email, iTunes, App from third parties, all will be displayed in the Manager of files. See Figure No. 454

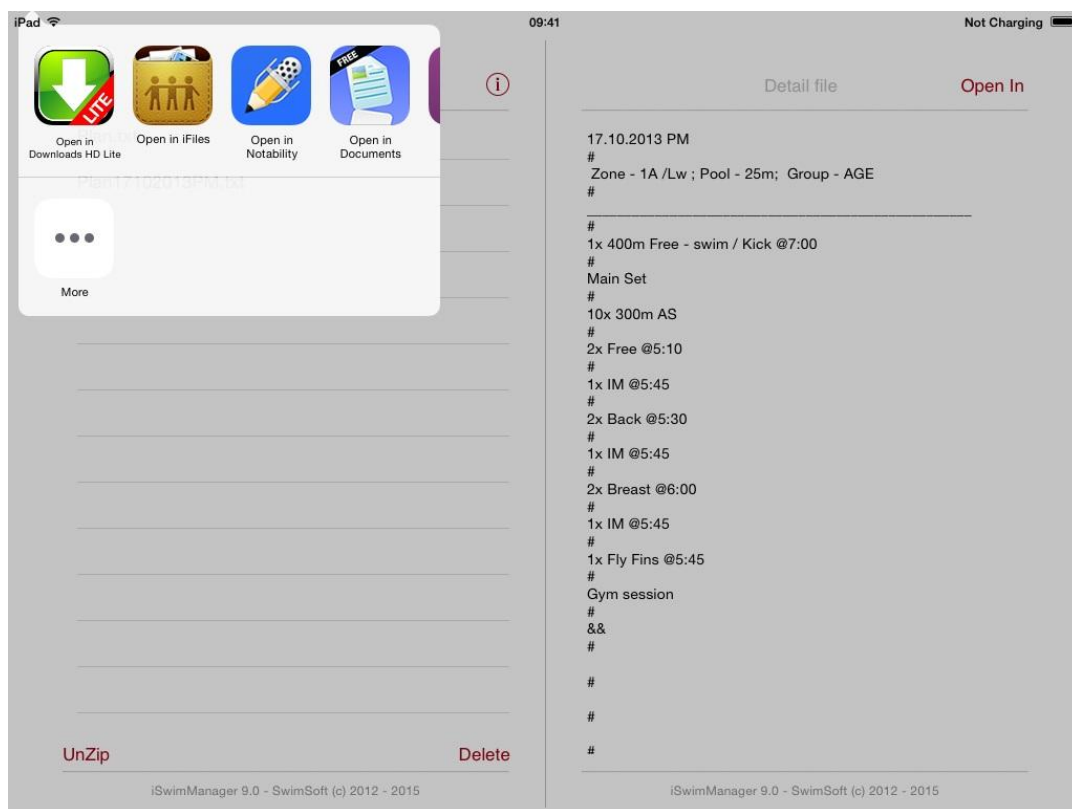

Tap the file to display its contents, see Figure No. 455

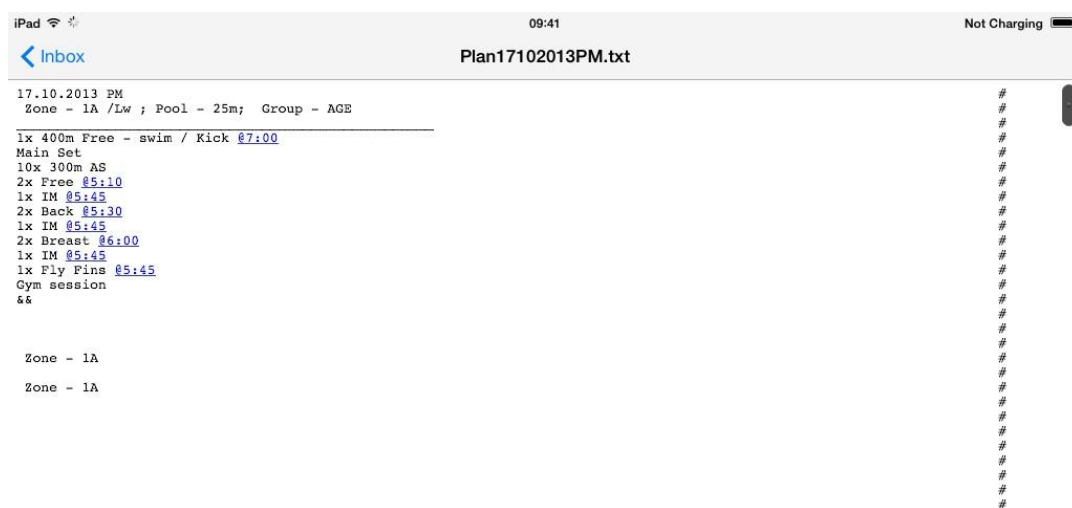

Download files in third-party App

If you need a file sent to a third party App will use the option in the **Open In** the top right to see a list of App us where we can see in image file open No. 456

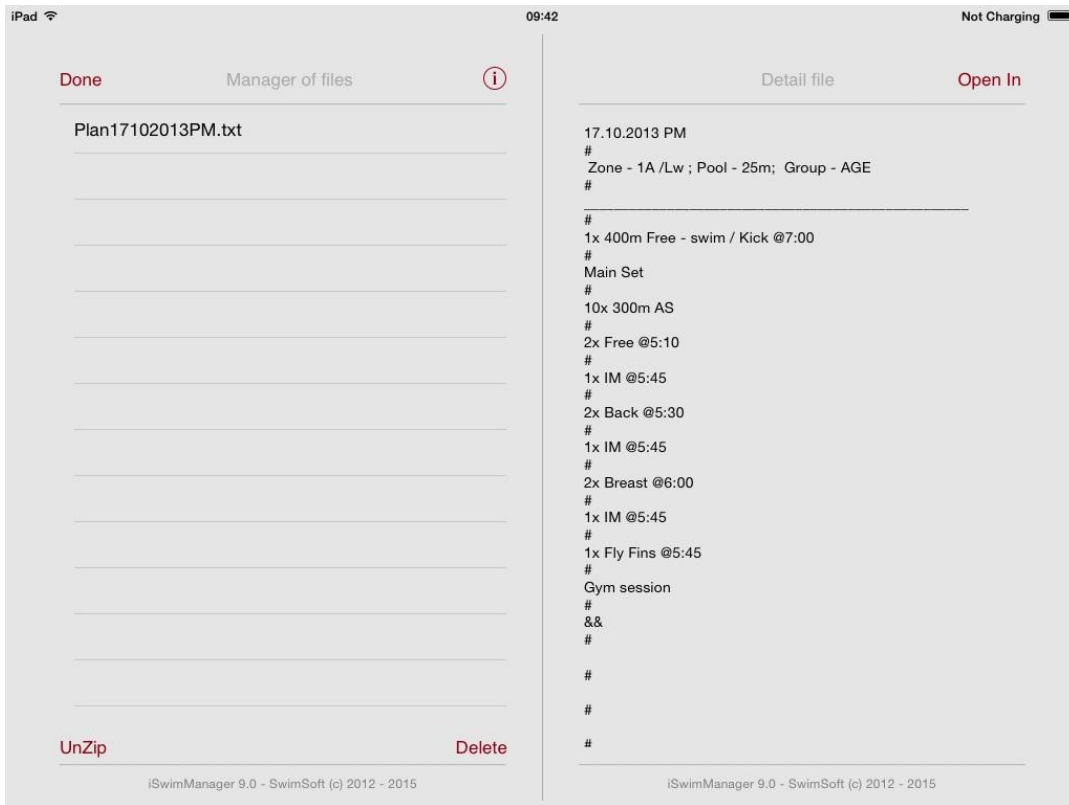

Confirming Downloads HD Lite is set to open in App Downloads HD Lite. Refer to Figure No. 457

Deleting files App

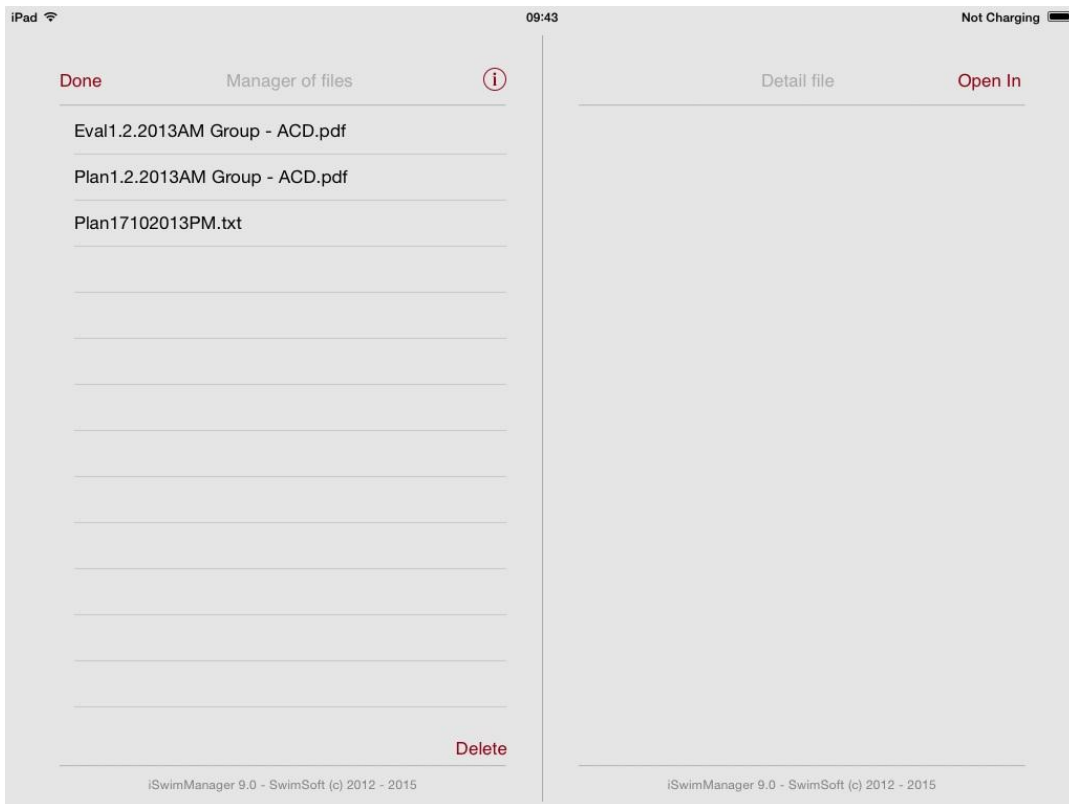

All files and txt hy3 SD3, which are found in App may be deleted as they are not needed and unnecessarily taking memory.

For this operation is designed **Delete** button. Tap the file, that lose its designation. Tap on **Delete** and file will delete see Figure No. 458

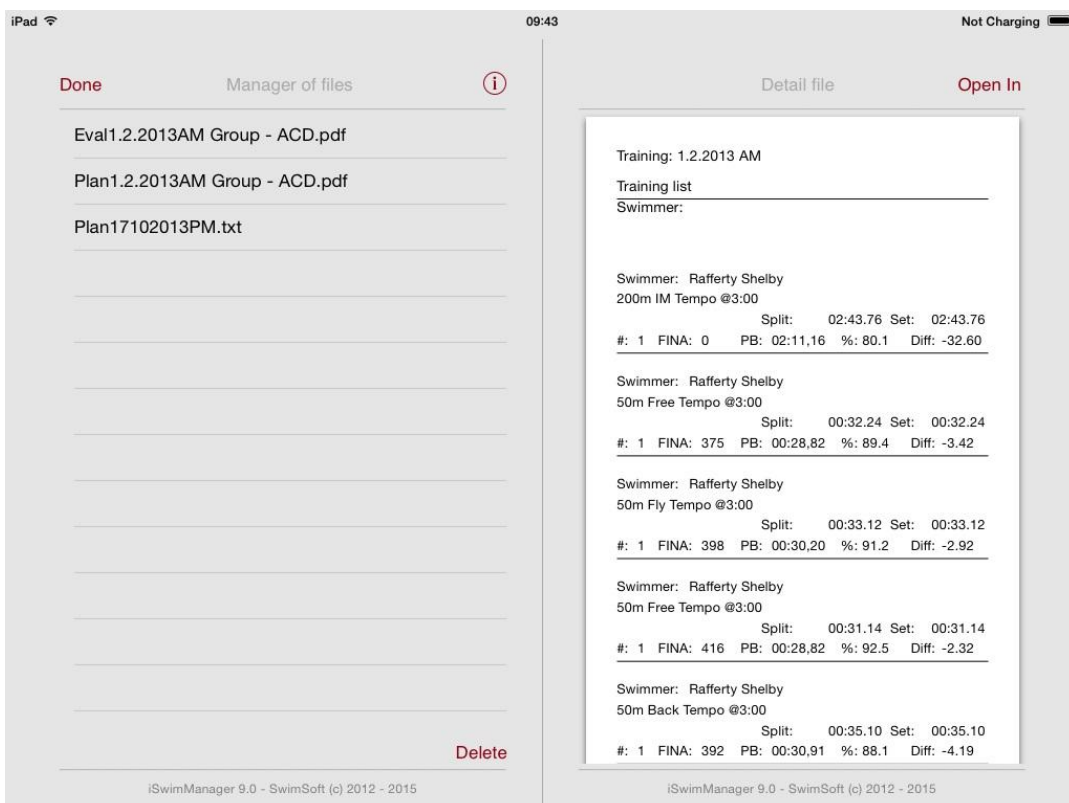

Viewing PDF files

Module Manager display and viewing of Files has been enhanced by the possibility of PDF see Figure No. 459

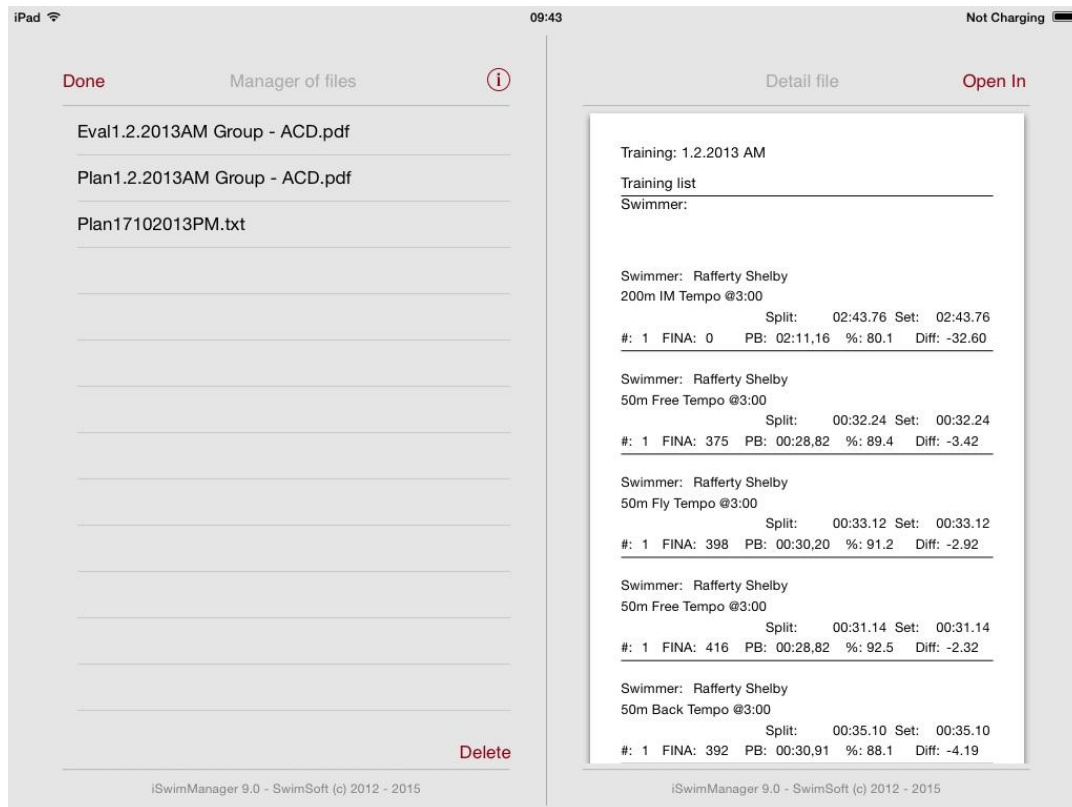

To view the contents of the file is performed by tapping the name see No. 460

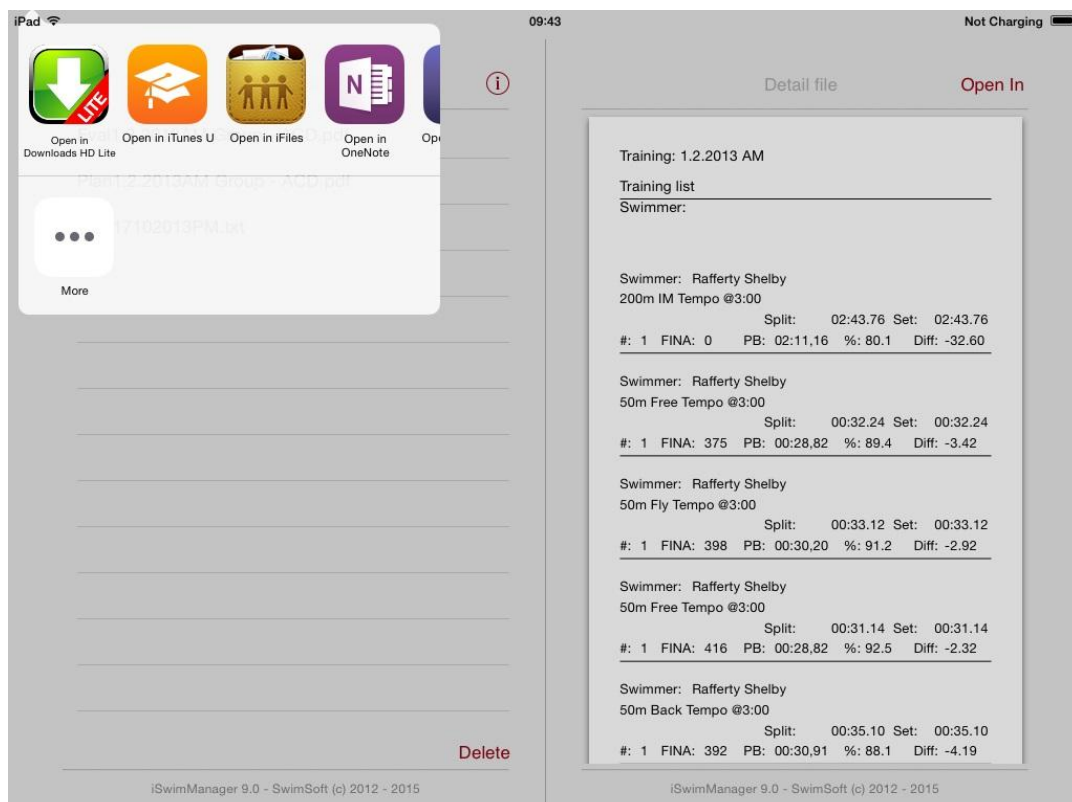

Viewing the PDF files in the App third party

Detailed viewing of PDF files, we recommend to carry out in the third parties App, which have special features for viewing and printing PDF files. Open the selected PDF file in third party App is very simple. Just tap on the selected file, see Figure No. 461

When you view the file press the button **Open In** and displays the screen No. 462

Select the third-party App you want to view the file in see picture No. 463.
